

CANSORB®-P Pressure Vessels

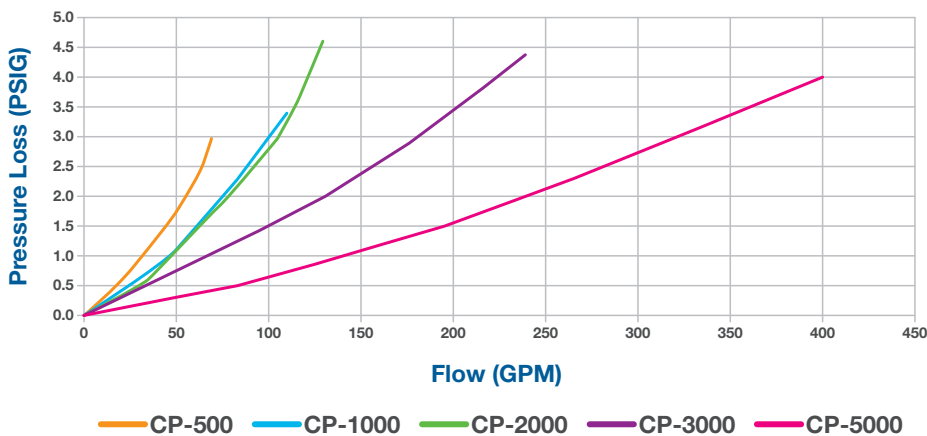

Modular Activated Carbon Liquid Adsorbers

The CANSORB P Series Modular Adsorbers are capable of operations where full backwash is required, including applications for backwashing activated carbon. The wide variety of vessels can handle various flow rates and are ideal for any size applications.

These units are fabricated of pressure vessel quality carbon steel and include a high solids epoxy lining. However, a different lining can be substituted for the high solids epoxy.

The liquid collection system is designed to promote even flow distribution and efficient adsorbent utilization. Manways are 18" x 14" elliptical located on top of the tank for easy access.

Product Features

- Capable of operations where full backwash is required
- Wide variety of vessels can handle various flow rates
- Ideal for any size municipality
- Fabricated of pressure vessel quality carbon steel
- High solids epoxy lining
- Inlet distributor and underdrain that provide an even plug flow

Modular Activated Carbon Liquid Phase Adsorber Drums				
Model #	Max Flow (GPM)	Max Pressure (PSIG)	Max Temp (°F)	Max Adsorb Fill
C-5	5	10	130	110
C-5 OH	5	6	130	110
C-5 Special	15	15	130	200
C-15 TX	15	15	130	200
C-15 OH	15	10	130	200

What's Your Unique Water Question?

For just about any water problem, Newterra has you covered. Our temporary ownership and rental solutions can save precious capital while solving a critical need. Newterra offers flexible terms and conditions to suit any customer.
