

PRODUCT DATA SHEET

VENT PURE/ MINI TANK VENTS

The **newterra** Mini-Vent media filter is a deep bed passive filter (no moving parts) designed to provide a simple and economical solution to odour control from sewer gas vent piping. This unit simply slides onto a riser pipe. Carbon can be changed out easily by removing the top Tee rain cap and dumping out the spent carbon.

Features:

- All components are grey PVC
- Push through design
- 12+carbon bed depth
- Rain cap outlet bug screen
- Different sizes available
- Shipped full of carbon

Optional

- Different colours
- Different materials
- Custom designs
